

Emission Testing Suspended

In order to facilitate the treatment and containment of COVID-19, Governor Lee issued Executive Order No. 15 on March 19th that extends motor vehicle registrations that expire between March 12, 2020 through May 18, 2020. The new expiration date, for registrations that expired between these two dates, is now June 15, 2020. **Therefore, the requirements for vehicle emissions testing are suspended until further notice.** The Division of Air Pollution Control will update this notice with details as to when vehicle emissions testing services will resume in the near future. The Division of Air Pollution Control will work to ensure that testing services are available in enough time for vehicles to be tested prior to the extended registration due dates. Please call 866-329-9632 with any questions.
